

Anette Nielsen

Here is some facts about me. I grew up with Golden Retrievers, but ended up with the well-known Flatcoat virus, when I in 1989 got my first Flatcoat, Lijynis Amanda, from my parents first Flatcoat litter. In 1991 I bred my first litter with my own affix Black Amandas.

I have during my breeders career used my dogs for show, breeding, regular hunting and fieldtrial, as much as time allows, but most important they also serve as wonderful familydogs for me. I breed 1-2 litters a year, have bred multiple champions, also in the time where we in Denmark also needed a 2 price in Open Class in Fieldtrial, to become a national champion .

I started judging in 2012 where I was authorized for my own breed Flatcoats, I have since then completed grp 8 and have now started grp 7.

When I am judging I value, condition, function and breed specifics.

Am looking forward to coming to your country to judge and seeing some nice dogs .
